PROJECTS

Izaiko Inventory- Mobile Inventory Management Application

Application developed for Android Platform completely written in Kotlin. Application integrates Firebase API, with use of Authentication, Firestore (NoSQL database), and Cloudstore. Allows users to create an account, build an inventory database, and track sales, and access sales metrics. [Izaiko Repo](#)

Conway's Game of Life - Cellular Automata Simulator

Windows Form Application developed in C# that simulates Conway's Game of Life. Application allows users to modify, simulation speed, simulation size, boundaries, cell and background color. Also supports file I/O. Extra mode added with custom implementation of Snake. [GameOfLife Repo](#)

CERTIFICATION

ServiceNow Certified System Administrator - Current

Technical Skills

Scripting Languages:

- JavaScript
- HTML
- CSS

OOP Languages:

- C++
- C#
- Kotlin

Source Control:

- Git
- GitHub

Tools/Utilities:

- ServiceNow
- Visual Studio
- Android Studio -ASP.NET (MVC)

Databases:

- Firestore
- MySQL/MSSQL

Software Methodologies:

- Agile
- Scrum
- Waterfall

Operating Systems:

- Windows
- OS X
- Linux

Professional Strengths

- Problem Solving
- Communication
- Creativity
- Inter-personal
- Adaptability
- Teamwork
- Leadership
- Quick Learning
- Organization
